## New Life Nyambene: rescuing children from the streets

The children have been traumatised by starvation, neglect and abuse; and over time we nurture them back into physical and emotional health. We provide them with food, healthcare, clothes and protection, but above all, with a supportive community who give them love, hope and purpose. We pay for them to attend local schools, and when they are old enough, vocational training colleges or further education.

New Life Nyambene is a partnership between Kenya and the UK. The Children's Home in the Nyambene Hills is managed and run by a dedicated team of Kenyans. In the UK, a group of volunteers supports the Home by raising funds for the children.

**Your £50 feeds a child for a month.**

Can you imagine a child of 7 years having to pick rotting food out of dustbins to survive? That was the reality of life on the streets for our children before they came to live at the Maua Street and Destitute Children's Home in Kenya. With rising food prices caused by drought and economic recession, making sure the children at the Home have enough to eat is a constant struggle. Your edible gift is a lifeline. Thank you.
